Scores reflect the existing baseline rules, not an average of the detailed checks.

Your next priorities

1. Form method review

Verify the real submission method and keep personal details out of URLs.

2. Rendered indexing directives

Confirm indexing intent with the owner before removing a restriction.

3. Duplicate page metadata

Use page-specific metadata for distinct services or intents.

4. Duplicate page metadata

Use page-specific metadata for distinct services or intents.

5. Small interactive controls

Review target size and spacing, especially on touch devices.

Findings to review (22)

These are prompts for investigation. Confirm the intended behaviour before implementing a change.

Mobile · LOW · desktop

1. Small interactive controls

<https://auditmywebsite.app/>

Observed evidence

3 visible controls under 24×24 CSS pixels; spacing exceptions are not evaluated.

Why it matters

A usable narrow-screen layout can make reading, navigation and enquiries easier.

Recommended action

Review target size and spacing, especially on touch devices.

How to verify

Test tapping and assess applicable accessibility exceptions.

Forms · MEDIUM · desktop

2. Form method review

<https://auditmywebsite.app/>

Observed evidence

1 forms declare GET with email/password/tel fields. JavaScript may override submission.

Why it matters

Clear, proportionate forms can make an enquiry easier and reduce avoidable confusion; actual completion requires measurement.

Recommended action

Verify the real submission method and keep personal details out of URLs.

How to verify

With owner permission, inspect a controlled submission and the resulting URL.

Mobile · LOW · mobile

3. Small interactive controls

<https://auditmywebsite.app/>

Observed evidence

3 visible controls under 24×24 CSS pixels; spacing exceptions are not evaluated.

Why it matters

A usable narrow-screen layout can make reading, navigation and enquiries easier.

Recommended action

Review target size and spacing, especially on touch devices.

How to verify

Test tapping and assess applicable accessibility exceptions.

Forms · MEDIUM · mobile

4. Form method review

<https://auditmywebsite.app/>

Observed evidence

1 forms declare GET with email/password/tel fields. JavaScript may override submission.

Why it matters

Clear, proportionate forms can make an enquiry easier and reduce avoidable confusion; actual completion requires measurement.

Recommended action

Verify the real submission method and keep personal details out of URLs.

How to verify

With owner permission, inspect a controlled submission and the resulting URL.

Mobile · LOW · desktop

5. Small interactive controls

<https://auditmywebsite.app/index.html>

Observed evidence

3 visible controls under 24×24 CSS pixels; spacing exceptions are not evaluated.

Why it matters

A usable narrow-screen layout can make reading, navigation and enquiries easier.

Recommended action

Review target size and spacing, especially on touch devices.

How to verify

Test tapping and assess applicable accessibility exceptions.

Forms · MEDIUM · desktop

6. Form method review

<https://auditmywebsite.app/index.html>

Observed evidence

1 forms declare GET with email/password/tel fields. JavaScript may override submission.

Why it matters

Clear, proportionate forms can make an enquiry easier and reduce avoidable confusion; actual completion requires measurement.

Recommended action

Verify the real submission method and keep personal details out of URLs.

How to verify

With owner permission, inspect a controlled submission and the resulting URL.

Mobile · LOW · mobile

7. Small interactive controls

<https://auditmywebsite.app/index.html>

Observed evidence

3 visible controls under 24×24 CSS pixels; spacing exceptions are not evaluated.

Why it matters

A usable narrow-screen layout can make reading, navigation and enquiries easier.

Recommended action

Review target size and spacing, especially on touch devices.

How to verify

Test tapping and assess applicable accessibility exceptions.

Forms · MEDIUM · mobile

8. Form method review

<https://auditmywebsite.app/index.html>

Observed evidence

1 forms declare GET with email/password/tel fields. JavaScript may override submission.

Why it matters

Clear, proportionate forms can make an enquiry easier and reduce avoidable confusion; actual completion requires measurement.

Recommended action

Verify the real submission method and keep personal details out of URLs.

How to verify

With owner permission, inspect a controlled submission and the resulting URL.

Mobile · LOW · desktop

9. Small interactive controls

<https://auditmywebsite.app/en/>

Observed evidence

3 visible controls under 24×24 CSS pixels; spacing exceptions are not evaluated.

Why it matters

A usable narrow-screen layout can make reading, navigation and enquiries easier.

Recommended action

Review target size and spacing, especially on touch devices.

How to verify

Test tapping and assess applicable accessibility exceptions.

Forms · MEDIUM · desktop

10. Form method review

<https://auditmywebsite.app/en/>

Observed evidence

1 forms declare GET with email/password/tel fields. JavaScript may override submission.

Why it matters

Clear, proportionate forms can make an enquiry easier and reduce avoidable confusion; actual completion requires measurement.

Recommended action

Verify the real submission method and keep personal details out of URLs.

How to verify

With owner permission, inspect a controlled submission and the resulting URL.

Mobile · LOW · mobile

11. Small interactive controls

<https://auditmywebsite.app/en/>

Observed evidence

3 visible controls under 24×24 CSS pixels; spacing exceptions are not evaluated.

Why it matters

A usable narrow-screen layout can make reading, navigation and enquiries easier.

Recommended action

Review target size and spacing, especially on touch devices.

How to verify

Test tapping and assess applicable accessibility exceptions.

Forms · MEDIUM · mobile

12. Form method review

<https://auditmywebsite.app/en/>

Observed evidence

1 forms declare GET with email/password/tel fields. JavaScript may override submission.

Why it matters

Clear, proportionate forms can make an enquiry easier and reduce avoidable confusion; actual completion requires measurement.

Recommended action

Verify the real submission method and keep personal details out of URLs.

How to verify

With owner permission, inspect a controlled submission and the resulting URL.

SEO · MEDIUM · desktop

13. Rendered indexing directives

<https://auditmywebsite.app/datenschutz.html>

Observed evidence

Captured meta directives: noindex. Absence is not proof of indexing.

Why it matters

Clearer search signals help search engines interpret the intended pages; this does not establish actual indexing or rankings.

Recommended action

Confirm indexing intent with the owner before removing a restriction.

How to verify

Recheck meta directives, HTTP headers and Search Console if authorised.

Mobile · LOW · desktop

14. Small interactive controls

<https://auditmywebsite.app/datenschutz.html>

Observed evidence

11 visible controls under 24×24 CSS pixels; spacing exceptions are not evaluated.

Why it matters

A usable narrow-screen layout can make reading, navigation and enquiries easier.

Recommended action

Review target size and spacing, especially on touch devices.

How to verify

Test tapping and assess applicable accessibility exceptions.

SEO · MEDIUM · mobile

15. Rendered indexing directives

<https://auditmywebsite.app/datenschutz.html>

Observed evidence

Captured meta directives: noindex. Absence is not proof of indexing.

Why it matters

Clearer search signals help search engines interpret the intended pages; this does not establish actual indexing or rankings.

Recommended action

Confirm indexing intent with the owner before removing a restriction.

How to verify

Recheck meta directives, HTTP headers and Search Console if authorised.

Mobile · LOW · mobile

16. Small interactive controls

<https://auditmywebsite.app/datenschutz.html>

Observed evidence

11 visible controls under 24×24 CSS pixels; spacing exceptions are not evaluated.

Why it matters

A usable narrow-screen layout can make reading, navigation and enquiries easier.

Recommended action

Review target size and spacing, especially on touch devices.

How to verify

Test tapping and assess applicable accessibility exceptions.

SEO · MEDIUM · desktop

17. Rendered indexing directives

<https://auditmywebsite.app/impressum.html>

Observed evidence

Captured meta directives: noindex. Absence is not proof of indexing.

Why it matters

Clearer search signals help search engines interpret the intended pages; this does not establish actual indexing or rankings.

Recommended action

Confirm indexing intent with the owner before removing a restriction.

How to verify

Recheck meta directives, HTTP headers and Search Console if authorised.

Mobile · LOW · desktop

18. Small interactive controls

<https://auditmywebsite.app/impressum.html>

Observed evidence

6 visible controls under 24×24 CSS pixels; spacing exceptions are not evaluated.

Why it matters

A usable narrow-screen layout can make reading, navigation and enquiries easier.

Recommended action

Review target size and spacing, especially on touch devices.

How to verify

Test tapping and assess applicable accessibility exceptions.

SEO · LOW · desktop

19. Duplicate page metadata

<https://auditmywebsite.app/>

Observed evidence

Shared by <https://auditmywebsite.app/>, <https://auditmywebsite.app/index.html>

Why it matters

Clearer search signals help search engines interpret the intended pages; this does not establish actual indexing or rankings.

Recommended action

Use page-specific metadata for distinct services or intents.

How to verify

Compare the affected pages after the change.

SEO · LOW · desktop

20. Duplicate page metadata

<https://auditmywebsite.app/index.html>

Observed evidence

Shared by <https://auditmywebsite.app/>, <https://auditmywebsite.app/index.html>

Why it matters

Clearer search signals help search engines interpret the intended pages; this does not establish actual indexing or rankings.

Recommended action

Use page-specific metadata for distinct services or intents.

How to verify

Compare the affected pages after the change.

21. Duplicate page metadata

<https://auditmywebsite.app/>

Observed evidence

Shared by <https://auditmywebsite.app/>, <https://auditmywebsite.app/index.html>

Why it matters

Clearer search signals help search engines interpret the intended pages; this does not establish actual indexing or rankings.

Recommended action

Use page-specific metadata for distinct services or intents.

How to verify

Compare the affected pages after the change.

22. Duplicate page metadata

<https://auditmywebsite.app/index.html>

Observed evidence

Shared by <https://auditmywebsite.app/>, <https://auditmywebsite.app/index.html>

Why it matters

Clearer search signals help search engines interpret the intended pages; this does not establish actual indexing or rankings.

Recommended action

Use page-specific metadata for distinct services or intents.

How to verify

Compare the affected pages after the change.

Scope and limitations

This audit was generated by a deterministic, rules-based evidence-to-finding mapper (agents/audit-builder/), not a human or LLM reading the page — it detects presence/absence of programmatically-checkable facts and cannot make the subjective quality judgments (e.g. value-proposition clarity) a human reviewer would.

Screenshots are not visually analyzed; presentation checks use explicit DOM facts only. Contrast, focus order, subjective messaging and real-user performance require separate review.

client_or_partner_logos and internal_engineering_platform_evidence are never auto-detected by this module (no reliable evidence available) — always reported as not-verified, never guessed.

No business, decision-maker, or firmographic research (stages 2 and 4 of the pipeline) has been performed.

Real-user Core Web Vitals, traffic, rankings and conversions are not measured.

Form delivery, checkout and booking completion are not tested; no forms are submitted.

Full keyboard/screen-reader testing, legal compliance, penetration testing and expert visual/content review require separate review.

No competitor research or analytics account connection was performed.

Bounded public-page browser observations and deterministic checks; no AI visual judgement or external account data.
